Link Belt Data

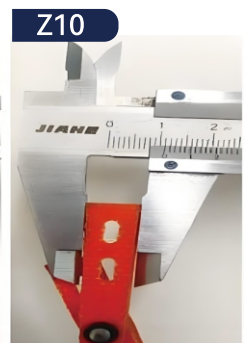

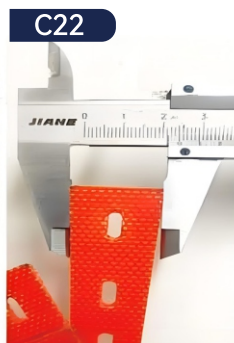

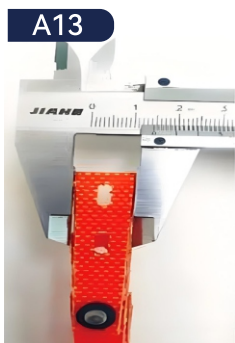

Twist link V-belt is a kind of high-performance V-belt that reduce vibration on table saws, drill presses, and other power tools by as much as 35%. It is made of highly polyurethane material, suitable for any length, no need to disassemble, even can be installed on the closed drive service, it is not easy to stretch and relax, can achieve accurate results as long as each belt has the same number of knots. It replaces the standard V-belt on most machines, and the length can be adjusted flexibly by adding or subtracting links.
